****Dashboard Story:****

This interactive food delivery dashboard enables managers to monitor city-wise business performance using real-time filters. For Chicago, key metrics show 49 orders generating \$1,170.25 revenue with a strong 77.55% repeat order rate and 4.1/5 customer rating. Saturday records the highest order volume, indicating weekends are peak demand periods for staffing optimization. Grilled Chicken Sandwich leads in both order count and revenue, while BBQ Ribs and Cobb Salad have the highest customer satisfaction ratings. The 39.80 minute average delivery

time highlights logistics areas for improvement to boost customer experience and retention.

The screenshot shows a web browser window displaying a Tableau Public profile. The browser's address bar shows the URL: `public.tableau.com/app/profile/shaik.mohammed.shoaib.raza/vizzes`. The Tableau Public header includes a search bar and navigation links. The profile banner is orange with a pattern of circles and a 'Customise Banner' button. The profile name is 'Shaik Mohammed Shoaib Raza' with the title 'Student' and an 'Edit Profile' button. A 'Create a Viz' button is also present. Below the profile information, there are tabs for 'Vizzes' (2), 'Favourites' (0), 'Following' (0), 'Followers' (0), and 'Stats'. Two dashboard thumbnails are visible: 'FOOD DELIVERY BUSINESS ANALYSIS DASHBOARD' with 14 views and 'food project' with 20 views. Both dashboards feature various charts and graphs.
